PROFESSIONAL PROFILE

Aspiring QA Automation Engineer with a basic understanding of the Software Testing Life Cycle (STLC) and Software Development Life Cycle (SDLC), and hands-on academic exposure to Selenium WebDriver, Java and Python. Comfortable with API testing concepts using Postman and REST Assured, version control with Git, and SQL/database fundamentals. Strong analytical, problem-solving and debugging skills, with exposure to TestNG, JUnit and BDD (Cucumber) frameworks, basic CI/CD concepts using Jenkins, and Agile/Scrum ways of working. A quick learner who enjoys collaborating in team environments.

CORE TECHNICAL COMPETENCIES

STLC / SDLC: Basic understanding of testing and development life cycle phases
Automation Testing: Selenium WebDriver basics, exposure to TestNG, JUnit
API Testing: Understanding of API testing concepts using Postman and REST Assured
Programming: Basic programming knowledge in Java and Python, OOP concepts
Database: Knowledge of SQL and database concepts
CI/CD & Agile: Basic understanding of CI/CD concepts (Jenkins), Agile/Scrum methodology
Version Control: Familiarity with Git/GitHub

TECHNICAL SKILLS

Testing: STLC, SDLC, Selenium WebDriver, Manual Testing, API Testing
Programming Languages: Java, Python, C
Web Technologies: HTML, CSS, SQL
CI/CD & Agile: Jenkins (basics), Agile
Version Control & Tools: Git/GitHub, Docker,

PROJECTS & HANDS-ON EXPERIENCE

Sign Language to Text Translation with Computer Vision

Tools: Python, OpenCV, MediaPipe, Raspberry Pi

- Designed and coded a real-time gesture-recognition system that translates sign language into text.
- Applied STLC concepts to plan and execute manual test cases, writing Python scripts to automate accuracy checks and log defects.
- Deployed the solution on Raspberry Pi and performed functional and regression testing to troubleshoot recognition-accuracy issues.
- Gathered requirements, translated them into test scenarios, and used Git/GitHub for version control throughout development.

INTERNSHIPS / TRAINING

Advanced Data Science and Data Visualization in Python

Built predictive models and analyzed complex datasets in Python, applying data-modeling and validation concepts to translate raw data into clear, tested insights.

Java Programming

Strengthened object-oriented programming and software-development fundamentals, including inheritance, polymorphism and encapsulation, through applied coding exercises.

EDUCATION

B.Tech in Electronics and Communication Engineering: 2022 – 2026 | Annamacharya Institute of Technology and Sciences, Rajampet | CGPA: 8.84 / 10
Board of Intermediate Education (MPC): 2020 – 2022 | Sri Chaitanya Junior College, Tirupati | 91.3%
Secondary Education (10th Grade): 2019 – 2020 | Z.P High School, Puleru | 9.8 CGPA

CERTIFICATIONS

- Certified in Java Programming (2026)
- Certified in Introduction to Data Science (2023)
- Certified in Python for Educators (2024)
